LOS ANGELES PRIMARIES SOCIALISTIC

FRUIT FLY FIGHT WILL BEGIN SOON

Within a short time the fruit fly fight will begin in earnest, and every effort will be made to combat the pest. W. M. Giffard, who is in charge of the campaign, is busy every day at his office at the Board of Agriculture station, mapping out plans of operations that will be submitted to the board and governor shortly.

The rules and regulations will cover every possible point in the matter, and as soon as they are officially approved, the work will start. All sorts of fruit will be watched. As bananas and pineapples are the only ones that at present are not quarantined, these fruits will receive the greatest attention.

A communication was received by the last mail from State Horticulturist Jeffrey of California. The matter of the fruit fly was mentioned, and regret expressed that such alarming reports had reached the mainland.

Mosquito Campaign; Governor's Statement

Governor Frear gave out his usual statement regarding the yellow fever situation this morning.

"There is more action of the citizens in the matter, and it is good to see. There have been no new developments since yesterday. The Board of Health is going ahead with the work at Kailua Camp, and the job of cutting down trees and shrubs is progressing as fast as possible. The work is being rushed in order to have it completed by Sunday, after which the danger period will begin.

"The sanitary department is devoting itself entirely to the work of completing the sanitary survey maps of the city, for use in the campaign against the mosquito. This afternoon there will be a meeting of the committee appointed yesterday, and the reports of the sub-committees will then be turned in.

"There is no use in calling a special session of the legislature till some definite plans are made. Developments must be awaited and, if needed, a special session could be called. There is a vacancy caused through the death of Senator Moore, and a special election could be called for at the same time as the session is announced.

"Special sessions of the legislature can be called by the Governor of the Territory in times of insurrection, calamity and great sickness. There have been many such sessions, and two years ago there was one of five days to legislate about the changes in the organic act.

"It has been suggested that the special session of the legislature, if called, be held in Hilo. That would be on account of there being supposed danger in Honolulu. At present there is no such danger, and developments have to be awaited.

"There is a shortage of labor at Kailua Camp and in its vicinity. One hundred and twenty men were ordered to be on hand this morning for work. Only seventy turned up, although the pay is \$2 per day.

The laborers declare that the work of cutting down trees is too hard for them, and a large number refused to consider the proposition.

The Board of Health officials are up against it in a way for labor, and as they can not employ aliens, the problem is a hard one. The suggestion has been made that the citizens' committee go ahead and hire Japanese to do the work. This may be done at once, as the work is urgent and must be completed by Sunday.

The yellow fever patient is doing well at Quarantine Island and no new cases are possible till Tuesday or Wednesday next.

The fate of the Hongkong Marine passengers and crew is interesting to many people who think that by this time the steamer is a floating pest house. Others state that the sick passenger may have been the only person on board the vessel to contract yellow fever.

NEW REFORM CABINET IS ORGANIZING

The morning dispatches say that the throne has practically surrendered and that, by proclamation, all political exiles are permitted to return. The Regent announces that he is to blame for the official corruption. The constitution just drafted will be submitted to the national assembly. A new cabinet shall be completely organized. Nobles are hereafter barred from holding the office of premier or minister of the interior. They are synonymous.

The city of Nanchang, capital of the Province of Kiangsi, has been captured by the revolutionists. Governor Fung Hi Kwei of the Province of Kiangsi has fled and his whereabouts is unknown. The provincial treasurer, Lau Chun Lam, has committed suicide.

There is a rumor in Peking saying that the Emperor and the Empress Dowager and all the nobles have fled from the palace.

Yuan Shih Kai Premier

(Associated Press Cables to The Star.)
PEKING, NOV. 1.—YUAN SHIH KAI HAS BEEN APPOINTED PREMIER AND IS ORGANIZING A CABINET, OF WHICH PRINCE CHING WILL BE PRESIDENT OF THE PRIVY COUNCIL.
FIGHTING AT HANKOW CONTINUES, BUT THE CITY HAS PROBABLY NOT BEEN RETAKEN.
THE PRESS RECEIVES THE REFORM EDICTS FAVORABLY.

M'Namara Evidence Granted

INDIANAPOLIS, November 1.—Possession of the account books of the International Bridge-Workers' Union and other McNamara evidence has been granted to the Federal grand jury.

Los Angeles Socialists

LOS ANGELES, Nov. 1.—The primary returns are in perfect order. 15,198 votes; Alexander, the Republican, 10,000. Fine view. Tel. All the Socialistic councilmen have qualified for the regular election. Women candidates appeared, but some will at the regular election.

The Naval Reviews

LOS ANGELES, Nov. 1.—A fleet of twenty-four warships and two submarines were off the harbor at dawn and were reviewed by Admiral Thomas, after which the vessels had maneuvers.

NEW YORK, Nov. 1.—Ninety-nine warships were inspected in port today by Secretary Meyer. They made a line seven miles long. Every battleship in commission was present.

President on Arbitration

MORGANTOWN, Pa., Nov. 1.—President Taft states that from now on he will speak much on arbitration and that he and Secretary Knox will be in the center of the Senate fight for the ratification of the treaties.

Nearing The Coast

TUSCON, Nov. 1.—Rodgers, the transcontinental aviator is here and will probably reach Los Angeles Friday.

Burial of Pulitzer

NEW YORK, Nov. 1.—Joseph Pulitzer was buried today from an Episcopal church.

Wall Street Bulls

NEW YORK, Nov. 1.—A bull movement is on in Wall Street.
Morning Cable Report on Page Two.

TENNEY'S TARIFF VIEWS DISCUSSED

There was much comment in sugar and market circles today over the opinion expressed by E. D. Tenney, as published in yesterday's Star, to the effect that a reduction of the sugar tariff by at least fifty per cent, or \$14 per ton, is practically certain; while the elimination of the duty entirely should not cause surprise. Public opinion on the street, speaking generally, doesn't like what it is pleased to call Mr. Tenney's pessimism.

Some brokers say that prices are going to be hurt by such a statement coming from a man of Mr. Tenney's standing. Others say that Mr. Tenney has been stampeded by a bunch of Californians with whom he has been associating for several weeks, who are of a naturally pessimistic turn, and that his views will not have any particular effect.

John A. McCandless, who also returned from the Coast yesterday, and was also quoted in yesterday's Star on the outlook for tariff revision, expressed a very different view from Mr. Tenney. He believes that the best sugar industry in the States is established that it will have powerful influence to prevent any serious meddling with the tariff. Mr. McCandless, by the way, is a heavy holder of sugar stock.

It will be remembered, however, that J. P. Goode, who returned from the Coast only about a week ago, made a statement on page four.

COMMUNITY ACTION TO KILL MOSQUITOES

At the meeting that was held yesterday afternoon, a real start was made on the fight against mosquitoes. The gathering was a representative one, and the speeches made showed that everyone was heart and soul in the matter of cleaning up the town.

A special session of the legislature was spoken of and, if that takes place, the session will probably be held in Hilo.

Every influential organization in Honolulu will be invited to join in and commence an educational campaign as regards the mosquito. The city's entire stock of supplies necessary in a fight against the mosquito will be inventoried today, and cables will be sent to the mainland ordering anything that is lacking.

The city will be divided up into districts that can easily be handled by mosquito squads, and forty non-commissioned officers of the army and marine service will take charge of these squads.

The meeting was unanimous on the subject of exterminating the mosquito, and the battle is now on.

A committee was elected to have charge of operations, the men who will head the campaign being W. F. Dillingham (chairman), J. R. Galt (secretary), L. Tenney Peck, Senator A. F. Judd, Frank Thompson, Dr. Tucker Smith, U. S. N.; President Pratt of the Board of Health, and A. R. Keller of the same body.

At three o'clock this afternoon, another meeting will be held in the rooms of the chamber of commerce, in the Stangenwald building.

The following resolution was adopted at yesterday's meeting:

Whereas, The presence of one case of yellow fever in Honolulu, contracted on a vessel visiting this port, makes it imperative that the business community of this city put its house in order against a possible outbreak of secondary cases, and

Whereas, In view of the growing commerce from Mexican, Central American and South American ports, it is vital to the continuous health of this port that mosquitoes be exterminated;

Therefore, Be It Resolved by the citizens of Honolulu here assembled, That we stand ready to cooperate with the health authorities to accomplish these ends;

And, Further Be It Resolved, That W. F. Dillingham, J. R. Galt, A. F. Judd, Major Kennedy, U.S.A.; L. Tenney Peck, Dr. Tucker Smith, U.S.N., and F. E. Thompson be constituted a committee to have charge of this cooperation, with full power to select their officers, fill vacancies in the committee or add to the committee, and with instructions to proceed at once to prepare such plans and organization as they may find best to guard against and handle any possible further occurrence of the disease and to rid Honolulu permanently of mosquitoes.

WOMEN'S MEETING

Under the auspices of the Women's Club, a mass meeting, chiefly for women, will be held at Y. M. C. A. hall tomorrow evening. All of the improvement clubs of the city are invited to be represented, but especially are the women's organizations, such as the Daughters of Hawaii and others, urged to participate.

Doctor Hobbs and A. Lewis Jr. are acting as a publicity and program committee for the gathering, the purpose of which is to disseminate knowledge concerning the yellow fever situation.

mail, will also be asked to represent Hawaii.

There was a conference on the Punchbowl lands today, and there will be another tomorrow. That of tomorrow will probably be the final one, as the roads have been definitely decided upon, as has the whole of the new layout.

There was also a conference yesterday about the reclaiming of the Hilo low lying lands. Hilo people in town attended the conference, and in view of the urgency of the work needed, it is possible that operations will be started soon.

Mr. Cocks of New York Gives a Snappy Talk Upon Snap Judgments

Hon. William W. Cocks, a member of the Fifty-ninth, Sixtieth and Sixty-first Congresses from New York, delivered a brief address at the noon luncheon at the Commercial Club today to several hundred members and representative citizens.

Mr. Cocks might have captioned his talk "The Gospel of Constructive Criticism," for that was along the line on which he spoke.

Possibly having in mind the article just published by Ray Stannard Baker concerning things Hawaiian, he said that it is easy enough for writers and surface investigators to spend a few weeks in looking over a community and then tell all the ills from which it is suffering and how badly things are being managed. It is another thing to know the deep lying causes of a situation, and to helpfully suggest a way out of the difficulties. He didn't propose to be one of this first class.

Mr. Cocks referred to the indifference which many apparently intelligent citizens display toward conditions affecting their government, citing the fact that men he knew in California went to the polls and voted on the vitally important amendments involving the most radical kind of legislation without really knowing what they were voting upon. And yet these same men will now be called upon to weigh legislation brought up in that great state, through the carrying of the initiative and referendum amendments. He did not state his views as to the practicability of these radical measures.

"But we must face the fact that the great mass of the laboring class is full of unrest, and is more and more positively demanding a greater share of the product of their labor. We cannot blind ourselves to these facts, and, instead of decrying or condemning conditions, we should set earnestly to work to find the solution of these great problems, through knowing their underlying causes."

Mr. Cocks referred to the high prices of commodities which has

CURIOUS DILEMMA OF HILO UNION

(Special Correspondence of The Star)
HILO, Oct. 31.—The interesting spectacle of Japanese being employed by the Hilo Labor Union to break a strike of its own members was to be witnessed on Monday in this city as a result of trouble between certain of the union laborers and their foreman, who is also the bondsman on the job. The trouble took place in the Hackfeld lumber yard in this city on Saturday and resulted, it is stated, from an unwillingness expressed by the labor union men to have their money handled by William A. Clarke, who is not only foreman but also the bondsman for the work.

A contract between Hackfeld & Co. and the Hilo Labor Union with the First Trust Company of Hilo as principal on the bond for the latter, and Clarke as surety, was recently signed, by which the union agreed to discharge a cargo of lumber, to be paid for at a specified rate per foot. There was something over two hundred dollars due the foreman on Saturday, which was paid to the foreman by the company. The men, however, desired that they should be paid personally by Hackfeld & Co., and stated the office of that concern in a body to demand their money, when they were told that it had already been turned over to their representative, Clarke. It appears that before this some of them had asked Clarke for money, and he had told them that they would have to wait until later in the day. This had coincided with their idea of doing business.

One of the members of the union delegation which had called at Hackfeld's office, who had fortified himself with liquor, then looked Clarke up again and proceeded to use his fists on the latter's face. This man, Kamelona by name, was arrested on a charge of assault, being released upon \$15 bail furnished by Supervisor Norman Lyman. Later on he was arrested again on a charge of drunkenness and spent the night in jail, his wife furnishing \$6 cash bail on Sunday morning. When his case was called on Monday morning he failed to appear and his bail was declared forfeited.

On Monday morning over a dozen of the union men failed to appear for work, being on strike in behalf of their comrade who had been arrested. Foreman Clarke promptly employed Japanese nonunion labor to fill the vacancies, as under the contract the union must furnish a certain number of men each day and accomplish a certain amount of work. Clarke owns considerable real estate in this city and for this reason was accepted as the bondsman and is considered as a responsible man for this sort of work.

Dr. D. H. Currie Meets With Painful Accident

Dr. Donald H. Currie, of the Marine and Hospital Service, and the yellow fever expert in Honolulu, was unfortunately not able for a few days to take any active part in the campaign about to be inaugurated to exterminate all danger from yellow fever in Honolulu.

On Saturday morning, about the time the yellow fever case was discovered in Kailua, Dr. Currie was working in his laboratory. Some sudden jar caused an old rusty rake that was hanging above him to fall. Two of the teeth struck him on the head, inflicting two severe lacerations in the scalp.

On account of the rusty condition of the rake, Doctor Currie feared lockjaw. He therefore took an injection of anti-tetanus serum. The results of an injection of this serum are often unpleasant and Doctor Currie is now experiencing these disagreeable after effects.

It is thought that in a day or so he will be about again and as well as ever for no serious consequences are expected and the danger from tetanus is negligible on account of the injection of the serum.

GOVERNOR DENIES MAINLAND REPORT

Governor Frear was this morning shown a clipping from a mainland paper in which it was stated that he was proceeding to Kansas City to attend a Trans-Mississippi congress.

The governor denied the report, and said that he was not, and could not leave the Territory at present. He stated that he had appointed A. F. Knudsen, who is on the mainland at present, to act as a delegate from Hawaii at the congress. A. W. Carter, if connected with in time by

TEN-MINUTE CARS ROLL OVER TOWN

Starting this morning, the entire system of the Rapid Transit is now running on a ten-minute headway car service. This includes the Kaimuki and Manoa branches, which heretofore have had but a twenty-minute service, except during the rush hours of the day. It is expected to have the new schedules in smooth working order within a day or two.

In order to make the time required, it has been found necessary to cut out a number of stations on the Puuhou line, and notices to this effect have been posted at the points affected. The stations thus discontinued are at Kaimuki Lane, College and Anapuni street, and one near Pawaia Junction. As soon as special curved rails are received from the coast, the connection of Nuuanu street line with the Hotel street line, by a link between Beretania and Hotel streets on Nuuanu, will be made, and the Nuuanu street and Hotel street services, including the Kaimuki line, will be combined.
